03

FY 2022 Earnings Forecast

Summary of the FY 2022 Plan

China business (Formulation platform)

Entry into the traditional Chinese medical products business

China business (Crude-drug platform)

 High growth and steady profit contribution (2022-2024 Sales CAGR: 30%)

Domestic business

 Stable growth and launch of the development of Kampo-related new areas (2022-2024 Sales CAGR: 5%)

Sales

Domestic business

China

•Expansion of the Kampo market by providing Kampo solutions that suit each medical practitioner through the integration of e-promotions and MR activities

•Sales expansion of high-quality raw material crude drugs, drug pieces and "Yakushokudogen" products

- Cost of sales
- •Rise in sales in the China business, depreciation in the yen's value, soaring commodity prices, etc.
- ·Improved production efficiency owing to a rise in sales volume

SG&A expense

- •One-off expenses, including for validation, ahead of full-fledged operations at the Tianjin Plant
- •Upfront expenses, including a rise in headcount and outlays to build an IT infrastructure in the China business

Newly added from FY 2022

*Growing formulations up to FY 2021
68 Shakuyakukanzoto
29 Bakumondoto

Indications for New Growing Formulations in the Three Important Domains

Build basic and clinical evidence with the aim of achieving write-ups in treatment guidelines

<Efficacy/benefits>

Decline in stamina after illness, fatigue, poor appetite, night sweats, cold hands and feet, anemia

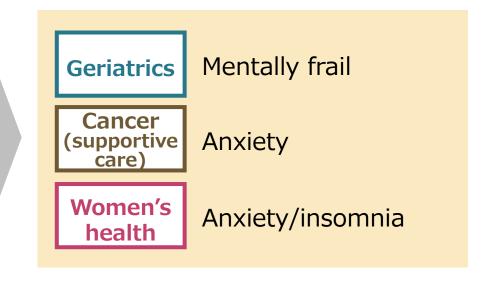

Physically frail (fatigue, poor appetite)

<Efficacy/benefits>

Following symptoms of a person that does not look well due to a weak constitution:

Anemia, insomnia, anxiety, neurosis

*What is frailty?

A condition between being healthy and requiring nursing care, a condition where mental and physical activity has decline

*Three components of frailty

Physically frail

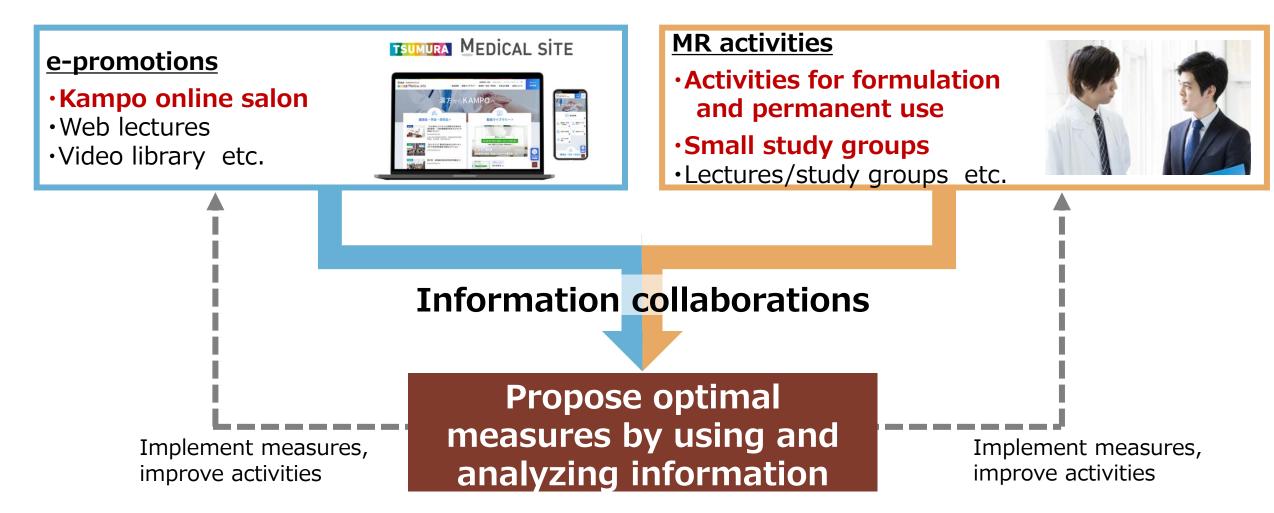

Socially frail

Mentally frail

Aiming to Deliver Information to Medical Practitioners

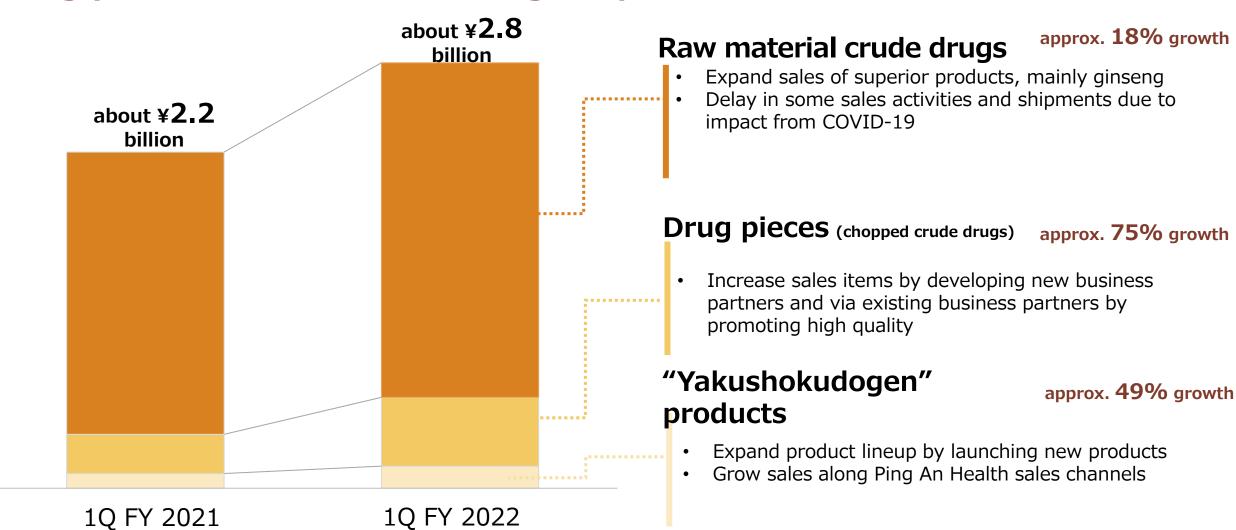

Target the continued expansion of the Kampo market by providing Kampo solutions that suit each medical practitioners

Overseas Sales (China Business)

In the crude-drug platform, expand sales of raw material crude drugs, drug pieces and "Yakushokudogen" products

Dividends (per share)	64円
EPS	196.1円
ROE	6.0%

Key Point of revised plan

Net Sales

2Q Revised Plan 68,900 million yen

Compared to the Initial plan

+1,900 million yen

■ The domestic business exceeded the initial plan due to the temporary impact of the re-expansion of COVID-19 and extreme heat, but the full-year level is expected to be in line with the plan.

Cost of sales

34,700 million yen

+1,200 million yen

■ Unrealized profit is declining due to a decline in inventory due to the suspension of production (lockdown) at the Shanghai Plant. The level of unrealized profit in the first half and the full year is expected to be as planned due to an increase in inventory caused by the resumption of production.

SG&A expenses

23,500 million yen

(200)million yen

■ Full-year SG&A expenses are expected to be in line with the plan, although some of SG&A expenses have not been used due to restrictions on activities caused by lockdowns in various parts of China.

Operating Profit

10,700 million yen

+900 million yen

Ordinary Profit

14,000 million yen

+4,000 million yen

■ Foreign exchange gains related to loans to overseas subsidiaries will be approximately 2.8 billion yen in the first half (year-end exchange rate: 20.37 yen/yuan). We will not revise full-year plan due to difficult to make rational calculations for the future exchange rate conditions.

Net profit attributable to owners of parent

9,600 million yen

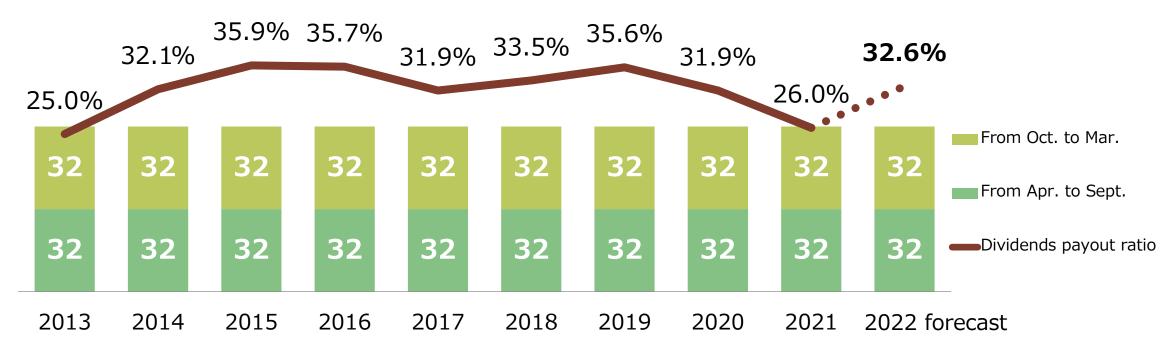

+2,200 million yen

Shareholder Returns

Policy

We aim to improve our corporate value by continually expanding domestic business and through growth investments in the China business, and by building foundations. Accordingly, we plan to implement stable dividends, taking into account factors such as medium/long-term profit levels and cash flow conditions.

Note: The FY 2022 year-end dividend and payout ratio (forecast) are an estimate based on the assumption that the dividend resolution is approved at the 87th Ordinary General Meeting of Shareholders.

Inquires about these materials

Corporate Communications Dept. Investor Relations Group investor_madoguchi@mail.tsumura.co.jp

Cautionary items regarding forecasts

- The materials and information provided in this presentation contain so-called forward-looking statements. Readers should be aware that the realization of these statements can be affected by a variety of risks and uncertainties and that actual results could differ significantly.
- Changes in Japan or other foreign countries related to healthcare insurance systems or regulations set by medical treatment authorities on drug prices or other aspects of healthcare or in interest and foreign exchange rates could negatively impact the Company's performance or financial position.
- In the unlikely event that sales of the Company's core products currently on the market be halted or should sales substantially decline due to a defect, unforeseen side effect or some other factor, there could be a major impact on the Company's performance or financial position.

 Kampo in important domains

Profile of the Tianjin Plant (Tianjin Tsumura Pharmaceuticals Co., Ltd.)

The plant will be established as a site in charge of manufacturing powdered extracts (intermediate products) for the domestic business

Phase 1 construction

- Construct the No. 1SD (powdered extract production), warehouse, etc.
- •Construction to be completed in May 2022, full-fledged operations scheduled to be started up at the end of FY 2022
- •Investment: approx. ¥15.0 billion

Phase 2 construction

- Construct the No. 2 SD (powdered extract production)
- •Construction to be completed in FY 2023, full-fledged operations scheduled to be started up in FY 2025
- •Investment: approx. ¥10.0 billion

Benefits from establish -ment

- Powdered extract production capacity for the domestic business: 20% increase
- Labor productivity improvement owing to automation*1: 13% improvement
- CO2 emissions reduction owing to the introduction of energy-saving technologies*2: 5,700 t/year reduction
- Reduction of water intake, mainly reflecting the reuse of cooling water *3: 70%

X1 Comparison with the Shanghai Plant

X2 Comparison with the case where energy-saving technology was not introduced (1st and 2nd period total)

^{*3} Planned values for the 2nd phase of the Tianjin Plant
